

Cooler Café

The security of a vending machine.
The product mix of a micro market.

The Cooler Café delivers the micro market experience with a smaller footprint. Equipped with Cantaloupe's Smart Lock technology and cashless POS device, the Cooler Café remains locked until a payment is made.

It's as easy as 1, 2, 3.

Shop the cooler by browsing the products displayed on the payment terminal.

Select your products by adding them to your cart and completing payment.

Enjoy your items once the cooler unlocks and allows you to grab and go.

A plug-and-play solution

- The Cooler Café, integrated into Cool Blu coolers, is easy to install and manage.
- Remotely access and monitor temperatures in real-time, allowing you to unlock or lock coolers.
- Create customizable planograms based on your unique product mix and manage it all in the Cantaloupe Go portal.
- Link one payment terminal for up to three coolers – so you can expand your product mix.

Save on upfront investment costs and maximize revenue with the Cooler Café!
